## 100% Cotton Flannel Cleaning Patches

Cleaning patches are die-cut from double napped 100% cotton flannel.

The natural absorbency of cotton fibers will safely remove fouling and fired residue.

### White, 100% Cotton Flannel Round Cleaning Patches

These work best with our Jags or Button Tips, located on page 40.

## Pillow Ticking Shooting Patches

The old time standby in muzzleloading has, for many years, been pillow or mattress striped ticking material. Made of a very tightly woven, 100% cotton material, these will stand up to very tight target load demands without tearing or burn throughs.

## Oiled Pillow Ticking Shooting Patches

Pre-oiled with a light, stainless oil specifically designed to inhibit rust and corrosion.

## 100% Wool Wads

Wads are made with high density, 100% wool fabric, which specifically allows the wad to compress and cover the entire diameter and rifling, yet return to it's original size. Wads are placed over the powder and under the bullet. Provides a gas check that will better improve accuracy and protect gun powder from lube contamination.

## Cap and Ball 100% Wool Wads

Wads are made with high density, 100% wool fabric, which specifically allows the wad to compress and cover the entire diameter and rifling and yet return to it's original size.

Place one wad on top of powder charge and then put a patched ball or lead bullet on top.

Wads provide a gas check to prevent chain firing.

### Dry Cap and Ball 100% Wool Wads

## Over Powder Wads

This 1/8" cardboard wad acts as the gas seal.

It is the first wad loaded over the powder in a muzzleloader or modern shotshell.

It can be used for both black powder and smokeless loads.

It also serves as a filler in plastic shotcups for reduced shot charges.

## Over Shot/Over Powder Wads Combo packs

The thinner, .025" paper wad is used to hold the shot charge in place in muzzleloaders and roll crimped shotshells.

In modern shotshells, place over a shot charge before crimping to ensure flatter, tighter crimps.

The thicker, 1/8" cardboard wad acts as the gas seal.

It is the first wad loaded over the powder in a muzzleloader or modern shotshell.

It can be used for both black powder and smokeless loads.

It also serves as a filler in plastic shotcups for reduced shot charges.

# Brass Cleaning Rods & Kits

## **NEW\***

We are now offering 3 powder coating color options for all handles except the rotating rifle handles.

### **Black, Pink & Glossy HOT Pink**

Brass rods are made of solid brass, with an aluminum handle.

The Rifle rods have a rotating handle. All other ones are stationary, including the .17 cal. rifle.

The length of the rod, is the working length. Length of handle is not figured in.

There are several sizes and style options available for each category over the next several pages.

All rods and rod kits come in a reusable tube unless otherwise noted.

The items that are sold in all of the kits, are also available for purchase individually.

## **CABLE-BRITE™ KITS**

An innovative design, featuring a sturdy, flexible cable with tips that will fit from .22 to .45 cal. A solid, aluminum handle will screw onto either end. Appropriate sized Dry and Premium Lube® cotton cleaning patches, bronze bristled bore brushes, and brass slotted tips are included in each kit. Also included is a Premium Lube® cotton Gun Wipe.

The AR15/M16/AR10 kits have an aluminum rod that allows you to get into the chamber for cleaning. Other cleaning supplies that are needed to clean the AR are also included.

Refill Paks are also offered for each kit.

These all are packaged in a convenient, reusable tube that travels with you.
